

Client: DBC HAIR STUDIO

Services: Website Re-Design & Development

Technologies Used: For Website Re-Design & Development: Responsive Web , Custom Design in Photoshop, WordPress CMS, HTML5, CSS3, PHP and other latest web technologies.

Client - DBC HAIR STUDIO - is located inside Golden Touch Salon and beautifully designed by client. The goal was to create a warm and inviting place that woman could come to and relax in a shabby chic private space.

Challenge - Client wanted to revamp the old website (see below screenshot the old website was on wix platform) which was not user & browser friendly, no design sense, and was outdated in terms of latest web technologies. The website was not responsive which is must in today's crazy world is as people are now surfing the web from their tablets and phones too.

Solution - After having a conversation with "Owner at DBC Hair Studio" we suggested the client to Re-Vamp the website keeping in mind Responsive Web Techniques and other latest web technologies and the client gave us a go-ahead to Re-Design which took 45 - 50 business days with latest web techniques (WordPress, HTML5, CSS3, PHP, Responsive Web and other web technologies where ever applicable.)

Result - After revamping the website client was extremely happy with the new look and feel of the new website which is user and browser friendly and it is built keeping in mind responsive and other latest web techniques which made the client happier.
